

# NEW YORK STATE PUBLIC HIGH SCHOOL ATHLETIC ASSOCIATION

## Safety and Research Committee School Physician Communications System

The Safety and Research Committee works closely with the State Education Department of Health Services and the New York State Department of Health in a variety of projects attempting to reduce the risk of injury and illness to youth involved in activities including physical education, intramurals, interscholastic athletics, camps and youth sports.

Members of the Safety and Research Committee, including some school physicians and other medical personnel, have requested a means for identifying all of the physicians appointed by NYSPHSAA member schools as their school doctors and establishing a communications system which will allow for sharing up-to-date medical information, procedures and protocols while providing a means for sharing ideas and concerns. Presently, there is no system which offers school physicians the opportunity to review their responsibilities and concerns. An example is the need to share the latest information relative to concussion management.

Section Executive Directors are asked to gather the names, addresses, telephone numbers and (maybe most importantly) emails for the one physician who is responsible for serving each member school in the section.

Please complete the following form for each of your member schools and return to me by October 12, 2007. When form is complete, simply hit the SUBMIT button.
