Adding to the Roster

1 – Login

https://rwschneider.com/NYSHSTennislogin.php

Username: Email in the database (Case Sensitive)

Password: Varies by Section (Case Sensitive) – check with the League Chair
3- Select the team you want to add players to... Note you can add players for any team (ie. The coach forgot to add a player for your match)
4- Add the players in the grid... If you press Enter the player information will be validated... Once you are done adding players (Please use proper Capitalization – we want the Player names to look nice in the papers...) Click the Validate player button... Note: you can have more than 15 players on the roster... just add them 15 at a time...

If you are having problems... not seeing the teams or players that you expect... and you are using Internet Explorer... consider using a different browser. The top browsers in terms of market share are Firefox (Click here to Download) and Google Chrome (Click here to Download). Internet Explorer is ranked 3rd... Firefox and Chrome are better at implementing the new HTML standards... You'll have a better Web Experience...
4. Select the Category – Mostly it will be Varsity... Non-League forces a League match to be counted as Non-League in the standings... That’s for League teams that play each other more than once and do not want the match in their League Standings. The website is smart enough to know if you play someone outside of your league that it’s a non-league match.

5. Select the date the match was played... Click in the date entry you should get a pop up calendar... Just click the day on the calendar
6– Fill in the match results... I’ve color coded things – Blue for Singles and Purple for Doubles... Skip over the Singles matches you don’t need... and use the purple ones for Doubles... If you don’t see a player in the pull down that played in the match, please add them in the player registration... then Validate the score... to get the next screen... Click the Make Corrections button to return to finish adding the scores... The new player added will now be in the pull down menu...

7 Enter the scores from the winner’s perspective... ie (6-4,6-4)... if you lost the match don’t enter it as 4-6,4-6... Enter it as 6-4,6-4... I’ll handle the flipping of the scores... Click the circle to the right of the players to denote the winner of the match. If you have a tie breaker score... two more pull down menus will appear under the set score... enter the tie breaker score in those...
Enter Comments for the Media... help the writer out... highlight something... Document unfinished matches...
Who had an injury and had to stop... why you played pro sets.... Note if it was a double header match and that’s why two scores are reported today. Or match called due to rain or darkness... You have 400 characters...
9. You have the option of adding Exhibition Matches... These are matches that will show up in the score report, but they are not added to the database. If you need them to qualify a player.. make sure you save the score report email for proof.
10 Validate the results by clicking the Validate button at the bottom...
You’ll see red if something is a miss… Use the Make Corrections button to fix it...

5. Look for the Record Updated lines or record added if you added an individual match... You should also see a line saying Email Sent at the bottom... The email should go to each coach and the media associated with each school....
Frequently Asked Questions – Score Reporting

• What if the individual Match was not completed?
  o Document the match in the comment section. Do not report the score for the match in the normal area as the match is not completed. That way you can finish the match at a later time. In this case, when the incomplete matches are finished, send the results to Tennis@rwschneider.com and I’ll add them.

• What if I have a double forfeit / default?
  o Since the match was not played, don’t enter anything for it... You can make a note in the comment section for the media if you want...

• What if the overall match score is a tie?
  o No problem, the database will accept a tie for the overall team match score. Individual matches cannot end in a tie... So, if they are not completed... enter the information in the comment section.

• What if we changed the scoring format to a 8 or 10 game Pro Set?
  o Enter the score as 10-5, 0-0 or whatever the score was... 2nd set will be 0-0... Note that the higher score should be on the left as we report the score from the winner’s perspective.... The website will handle flipping the scores when they go into the database... If you enter it wrong, the match will look like a loss when it should be a win...

• What if we split sets in the match and used a super tie breaker to decide the match?
  o You can enter the super tie breaker as the 3rd set... or you can score it 1-0 in the 3rd set... if you go with the 1-0, you will get a warning... but the site will accept the scoring...

• How do I enter a Default / Forfeit?
  o Enter the player’s name(s) for the team that was ready to play... They get credit for the win... The scoring should be 6-0, 6-0... Depends on the section if they use Default or Forfeit... I tend to think of a Match that was never played as a default... Some sections wanted to use Forfeit...

• How do I handle an injury in the middle of the match?
  o Document the score as it was at the time of the injury in the comment section... To document the win in the database, you may have to fudge the score such that the winning player(s) win the match... If the injury happened in the 1st set the score would be a single set... higher score on the left... 0-0 for the second set... You will get errors if the set was not won by two games (other than a tie breaker situation)... but it will be accepted... If the set end up as split (injury happened in the 2nd set... use 1-0 for the 3rd to denote the winner...

• How to enter the exhibition matches?
  o The exhibition matches at the bottom of the score report are not entered into the database... They are added only for the media... Players like to see their names in the media!

• How do I enter a tournament?
  o Use the Tournament brackets... I have several to pick from...

• What if I made a mistake when I entered the score?
  o You can correct a match in the database by selecting “Correct Matches Entered in the Database”... Same tab as the Score Report...

• What if the score is entered twice?
  o This happens time to time... Could be due to using the browser back button or both coaches enter the score when only one should... Send a note to Tennis@rwschneider.com and I’ll delete the extra match

• What if we play a Double Header?
  o Note that in the comment section for both matches for the media... that way it won’t be looked at as a duplicate score report...

• How do I add commentary to the match?
  o Enhance the media coverage by adding comments in the comment section.... First win for a player... describe the conditions...sportsmanship... injuries... records... winning a title... anything that the media could put into their storyline... You have a limit of 400 characters...
• What if the Roster for the opposing team is not up to date?
  o Please add the players to the roster... go to another Tab or window... login and add the player via the Player Registration... Go back to the original Tab or window... Click to validate the score (button)... Click the button to make corrections... the players just added will show up in the pull down menu... Best practice is to check the roster before reporting the score... Please don’t just put down a random player or default / forfeit for players not on the roster... it looks bad to the media and makes more work for me to fix it later... Some coaches document missing players in the comment section... it’s less typing to add the player to the roster.

• What if I have multiple ways of spelling the player’s name in the database?
  o There is a page to align the player’s name in the Info & Forms Tab. The link is: Correct Player Name... This will allow you to align the player name if it was spelled incorrectly or the player wants to be called William instead of Will... Be careful that you don’t merge the wrong player records... You will get an email for the things that are changed in the database... it’s a manual process to restore things... so be careful... This would be used after corrections to the roster... mostly around the time when you are putting together records for the tournament... (Player Stats)... This problem is evident when selecting the player to print their stats and you see similar spellings for the same player...
